Bio

A charming entertainer, a bit of a nerd and driven by curiosity: Ömer builds bridges between people and technology.

With a M.Sc. in Business Engineering, he founded one of the very first web design agencies in the Netherlands, back in 1996. In 2005, he moved back to Germany and into digital marketing with his own agency, which he still runs.

Ever curious, he continued into innovation, change and digital transformation. He became an international keynote speaker, wrote several books, he offers both consulting and coaching as a trusted advisor, has recorded a dozen on-line courses in both English and German and is a lecturer at several universities.

Happy Clients

Ömer works for world-class brands like Audi, BASF, Bayer, John Deere, Google, Hermes, Husqvarna, Kyocera, Merck, Nikon, Mitsubishi, SWISS, Singapore Airlines and Volkswagen. But his list of happy customers also includes many medium-sized companies, associations and non-profit organizations.

"Thanks to you, this was one of my best fireside chats ever!"
Thomas Kuczek, Head of Chrome Enterprise (DACH), Google

"Exactly the right message at the right time. We need this kind of external input."
Rolf Thomke, Regional eCommerce Manager Europe, Singapore Airlines

Truly International

Ömer fluently speaks English, German and Dutch (and is still working on his French and Turkish). With his multi-cultural background and a family from half a dozen nations, "international" is part of his everyday life.

He quickly connects with international audiences, especially in groups from several nations and with varied levels of fluency in English.
